

WE INSTALL HIGH QUALITY MOVABLE PARTITIONS

- Local Government
- Schools and Education
- Conference Centres
- Offices
- Churches
- Hotels

Daista Ltd supplies and installs high quality movable partition systems to help you create multiple working or living areas. One large room can make it impossible to successfully hold more than one function or meeting at a time. Our foldable dividers enable you to separate an office or conference room into two giving you a flexible and functional space.

We provide manual and electric operable partitions, accordion doors and glass wall systems that can be adapted for a range of environments.

We offer two product ranges the **700 series** and **Signature 8000 series** both are highly versatile, easy to use and are constructed using the latest technology and materials.

Daista Ltd offers a full service from helping you decide which movable partition solution is most suited to your internal space to installation and aftercare.

Foldable partitions, room dividers, sliding walls - whatever you like to call them we can help you make the right choice.

Signature 8000 series

Our benefits

Strong, durable and guaranteed to last

You can be assured that our partitions will endure years of use even in the busiest meeting venue. They are built with a unique steel frame that is neatly hidden by the panel finish of your choosing. Our panels come with a two year parts and labour limited warranty and the suspension system has a five year limited warranty.

Good quality partitions at affordable prices

We pride ourselves on offering technologically advanced wall systems designed to enhance your internal environment at an affordable price. We can provide you with a competitive quotation based on your chosen system, features and finish.

We have the knowledge

Our staff can help you decide which partition is best suited to your needs. We have many years of experience to draw on to help you understand the various configurations, features and finishes. Please get in touch and we'll be happy to talk through our product range.

Signature 8000 series

700 Series, paired panels

700 series, single panels

700 Series

Movable Partition System

Why choose the 700 series?

Overview

This highly flexible wall system uses the latest technology and will enhance any internal space. It has a unique welded steel frame, which provides a solid construction to endure high usage. The panels are designed in a way that provides a well-designed smooth wall face and seal to help limit sound from the separated internal areas.

The 700 series combines durability, design and acoustics making it an outstanding choice.

Available features for the 700 series:

PASS DOOR FEATURES

Pass doors may be incorporated in selected panels to provide fire safety, service entrance or general access to an area. Doors are sized and provided with hardware to meet Health and Safety requirements.

The 700 SERIES pass door system has a host of features and options:

- Heavy-duty welded laser-cut steel panel and door framing systems
- Health and Safety compliant push-pull door hardware
Aluminum-reinforced protective door edge trim for durability and identification
- Face-activated bottom seals with stabilising downward force

- Field-adjustable automatic bottom seals on door leaf
- Complete panic bar hardware*
- Concealed automatic door closer*
- Inset exit sign*
- Door viewer*
- Door window*
- Key lock on both standard or panic bar hardware*

ALUMINUM TRACK SYSTEMS

The 700 series aluminum track system is smooth and quiet to operate. The track system has been tried and tested over a number of years to check its endurance, ease of movement and resistance to corrosion.

CUSTOM-BUILT POCKET DOORS

If the partition needs to be stored out of sight in a door closet or "pocket" we can supply a matching Pocket Door. The doors are generally used when the movable partition is sealing to the face of the Pocket Door. The units are of the same construction and acoustical rating as the partition. Doors are available in single, double and bi-fold configurations and designed to your specific requirements.

WORK SURFACES

The movable partitions systems can double as a work surface for added benefit. You can choose from dry marker boards, chalkboards and tackable surfaces which are recessed into the panel for protection and design purposes.

FINISHES

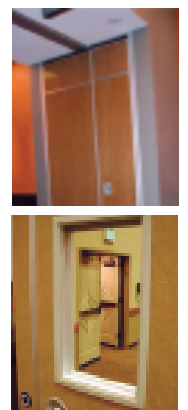

Traditional finishes of plastic laminate, melamine and wood veneer are available in a variety of colours and textures. Vinyl, fabric and carpet options are also available.

WARRANTY

The 700 SERIES products are guaranteed against defects in material and workmanship for 12 months. Aluminum track and trolleys systems are guaranteed for an extended period of time when a competitive service agreement is taken out with Daista Ltd. This would include regular health and safety checks along with maintenance of the Acoustic movable partitions.

Crystal options - glass sliding partition

Signature 8000 Movable Partition System

Why choose the Signature 8000 series?

Overview

The Signature 8000 series has all the benefits of the 700 series but is perfect for the larger internal space. The Signature panels are built with a strong steel reinforced aluminum alloy frame that provides strength and stability as well as protection to the panel finish while panels are in motion. The unique combination of our frame and various available substrates ensures a panel that will last for years.

CRYSTAL OPTION - GLASS SLIDING PARTITIONS

The Crystal option offers all the advantages of the Signature 8600 Product in a unique double glazed full height window. Crystal panels can be used in conjunction with standard solid Signature panels or as a complete movable partition system. Offering superior acoustics with vertical interlocks and mechanical top and bottom seals they offer many opportunities to the designer including internal blinds and multiple types of glazing. All the advantages of an movable partition with the beauty of a glass wall, Crystal single panel units are the answer to your need for a truly flexible glazed unit.

PASS DOOR FEATURES

Pass doors may be incorporated in selected panels to provide fire safety, service entrance or general access

to an area. Doors are sized and provided with hardware to meet Health and Safety requirements.

The Signature 8000 SERIES pass door system has a host of features and options:

- Heavy-duty welded laser-cut steel panel and door framing systems
- Health and Safety compliant push-pull door hardware
- Aluminum-reinforced protective door edge trim for durability and identification
- Face-activated bottom seals with stabilising downward force
- Field-adjustable automatic bottom seals on door leaf
- Complete panic bar hardware*
- Concealed automatic door closer*
- Inset exit sign*
- Door viewer*
- Door window*
- Key lock on both standard or panic bar hardware*

ALUMINUM TRACK SYSTEMS

The Signature 8000 series 700 series aluminum track system is smooth and quiet to operate. The track system has been tried and tested over a 10 year period to check its endurance, ease of movement and resistance to corrosion.

CUSTOM-BUILT POCKET DOORS

If the partition needs to be stored out of sight in a door closet or "pocket" we can supply a matching Pocket Door. The doors are generally used

when the movable partition is sealing to the face of the Pocket Door. The units are of the same construction and acoustical rating as the partition. Doors are available in single, double and bi-fold configurations and designed for your specific requirements.

Other products

Along with our two main product lines, the 700 Series and Signature 8000 Series, Daista Ltd can also supply and install Accordion Folding Partitions and Gymnasium curtains for sports halls. Many of our products can be electrically driven where manual operation is not practical.

ELECTRIC OPERABLE PARTITIONS

We offer several electric driven models including: The Gymdoor 801, the best way to divide gymnasiums and auditoriums where manual operation is not practical, and several different Signature 8000 models - which are ideally suited for conference and meeting rooms.

ACCORDION FOLDING PARTITIONS

Our Unifold Accordion Door is beautiful and durable with acoustic performance from low to moderate acoustics. Non-acoustic doors are also available. Accordion doors offer an economical solution to areas where a flat panel operable partition is not practical.

GYMNASIUM CURTAINS

The Gymfold offers gym curtains in both a single and a unique double wall construction which are electrically hoisted to the ceiling. Also offered are economical manually operated, horizontally sliding curtains.

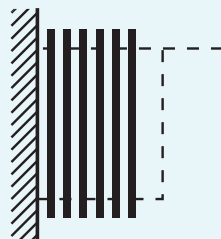

FOLDING PARTITIONS

Our Folding Acoustic Partition is durable and attractive with acoustic performance from low to moderate acoustics. Non-acoustic doors are also available. The Folding Partition offers an economical solution.

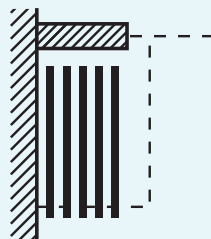

Stack modes

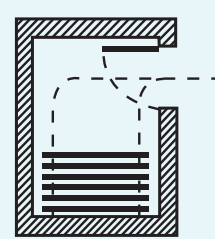

These diagrams show the possible panel stacking configurations for both single and paired panels.

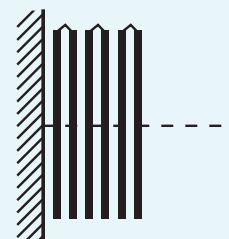

Single Panels:
Remote (#55 track)

Paired Panels:
Centre (#45 & 55 track)

Service and repairs

Daista Ltd offers an aftercare service to maximise the effectiveness and durability of its products. A regular service helps ensure that the tracks remain clean and lubricated, panels realigned and acoustic performance maintained and operational training given if needed.

Health and safety is important to us. We can give operational training to your staff as well as carry our risk assessments.

We can be called upon to maintain, service and repair your existing movable partition systems as we have extensive knowledge and expertise in this field. We can replace panels, track and roller systems as well as repositioning your movable wall.

Please contact us to find out about our various servicing options. We could come out to you on a regular service basis or simply be available to you for urgent repair work.
